Payline plugin

You need to follow the configuration steps to set up the Payline plugin for WooCommerce.

Plugin for WooCommerce

The plugin for WooCommerce is available as a compressed file.

It contains the elements allowing to use the Payline web services, as well as the integration of Payline within the front-office (payment) and back-office (configuration) of your store carried out under WooCommerce.

Download the plugin

Veillez cliquer sur le lien pour télécharger le plugin : [woocommerce-payline_v1.4.3.zip](#)

 The github version is no longer up to date : [github.payline.woocommerce](#)

Please click the link to download the plugin: [woocommerce-payline_v1.4.6.zip](#)

- Wordpress 6.2.2 compatibility
- Woocommerce 7.2.2 compatibility
- Payline PHP SDK upgrade to 4.74

V1.4.5: the [woocommerce-payline_v1.4.5.zip](#) plugin

- WooCommerce 3.0 to 4.9.2
- Upgrade with the PHP 4.71 SDK.
- COFIDIS payment method: improvement of the Pending state to manage orders on WooCommerce.
- Taking into account the On-hold status listed on WooCommerce on the order.

V1.4.4

- Upgrade with the PHP 4.69 SDK.
- Positioning the API number to 26.

V1.4.3

- Upgrade with the PHP 4.66 SDK.
- Correction to the first due date for payments N times.

V1.4.2

- Added a configuration to choose the final status of the order
- Fix on 50 character truncation in UTF8
- Correction on log usage error

Plugin Compatibility

The plugin for WooCommerce is developed and tested with the following environment:

- WordPress 5.5.3
- WooCommerce 3.0 to 4.9.2
- Payline PHP SDK 4.59

Integration of the plugin in your shop

Pre-requisites

The Payline plugins for WooCommerce are built around the Payline PHP kit, whose operation requires the activation of PHP extensions : `php_mbstring`, `php_openssl`, `php_soap` et `php >= 5.3.0`.

You must also have Payline account to configure your plugin.

The Payline solution is based on the web services call, make sure that the secure web services call is possible with your hosting solution (the opening of ports 8080 and 443 in input / output is necessary).

Installation under WooCommerce

Log into your WordPress back office. Click on **Add New** in the **Extensions/Plugins** menu.

Then add an extension by clicking on the Upload an extension link.

Then select the Payline plugin file that you downloaded above.

To activate the plugin: click Activate the extension.

Configuration

To start configuring the plugin:

- Click on Settings CPT for full payments ;
- Click on Settings NX for subscription payments ;
- Click on Settings REC for recurring payments.

You can also find the types of payments in the WooCommerce menu-> Settings> Payments then Manage to configure these types of payments.

Full payment (CPT)

General settings

- **Status** activates the display of the payment type in the order process.
- **Title** is the wording under which the Payline payment is offered to the buyer in the ordering process.
- **Description** is displayed to the buyer when Payline payment is selected.
- **Logs list** allows you to activate the tracing of events relating to Payline in the specified file. Do not select on production.

Connection settings

- **Payline ID** is the element that was communicated to you when creating your account. You have a merchant identifier per environment (test and

production), to be completed in the environment field (test and production).

- **Access key** is your key for calling Payline web services. A key was given to you when creating your account. You can create more keys at any time via the Payline administration center.
- **Field environment** corresponds to the Payline environment to which your payments are linked. The test environment is reserved for tests, payments are not cashed.

Proxy settings

- **Host, Port, User and Password** must be valued with the same parameters as those possibly used to access the Internet from your server. Leave these fields blank if you are not using a proxy.

Payment settings

- **Default language** is the language in which the payment page is displayed.
- **Payment action** determines the transaction type carried out during a payment :
 - **Authorization**: this operation type must be validated in the Payline administration center within 7 days for the payment to be effective. This allows you, for example, to debit your customer only when their purchase is shipped to them.
 - **Authorization + Capture**: this operation type corresponds to full payment, the buyer is immediately debited.
- **Paid order status**: select the order status once payment is done. In the WooCommerce admin center, you can set the order to completed or in progress status as per your requirement.
- **Widget integration mode**: select your widget display (payment form).
 - In-Shop Lightbox mode, In-Shop column mode, In-Shop tab mode, Redirection mode: [see details here](#).
- **Personalized page** is used to enter a personalization code for your payment pages, configured from the Payline administration center. Only for redirection mode.
- **Contract number** is your number which determines the point of sale used.
- **Primary contracts (mandatory field)** this field is mandatory with the contract numbers (separated by semicolons) corresponding to the payment method you wish to offer your customers for a first payment attempt.
- **Secondary contracts** (optional) this field must be filled in with the contract numbers (separated by semicolons) corresponding to the payment method that you wish to offer to your customers for a second payment attempt, if the first attempt has failed.

Installments payment (NX)

The configuration of these parameters are described in the CPT account payment chapter (above).

General settings

- **Status** activates the payment type display in order process.
- **Title** is the payment name to the buyer in order process.
- **Description** is displayed to the buyer when Payline payment is selected.
- **Logs list** allows you to activate the events tracing relating to Payline in the specified file. ⚠ Do not select on production.

Installments

- **Payment frequency:** determines the payments period.
- **Number of installments (Numerical format):** Number of payment installments proposed for this payment type.

The screenshot shows two configuration panels for 'PAYLINE N FOIS'. The top panel, 'PARAMETRES DE BASE', includes a 'Statut' section with a checked checkbox for 'Activer Payline N Fois', a 'Titre' field containing ' Paiement en 3 Fois', a 'Description' field with the text 'Vous allez être redirigé sur les pages sécurisées de Payline à la fin de votre commande.', and a 'Journal des logs' section with a checked checkbox for 'Activer'. The bottom panel, 'PAYLINE N FOIS', features a 'Fréquence des échéances' dropdown menu set to 'Une échéance tous les jours', a 'Nombre d'échéances' input field with the value '3', and a 'Réinitialiser la configuration' link. A blue button at the bottom is labeled 'Enregistrer les modifications'.

REC subscription / recurring payment

General settings

- **Status** activates the payment type display in order process.
- **Title** is the payment name to the buyer in order process.
- **Description** is displayed to the buyer when Payline payment is selected.
- **Logs list** allows you to activate the events tracing relating to Payline in the specified file. ⚠ Do not select on production.

Subscription

- **Payment frequency:** determines the payments period.
- **Maximum Number of installments (Numerical format):** Number of payment installments proposed for this payment type.
- **Eligible product ID (Mandatory):** if the field is empty then this payment type will not be offered. Fill a product IDs list that can offer for recurring payment.

The screenshot shows two configuration panels for 'PAYLINE PAR ABONNEMENT'. The top panel, 'PARAMETRES DE BASE', includes a 'Statut' section with a checked checkbox for 'Activer Payline par Abonnement', a 'Titre' field containing ' Paiement par abonnement / REC', a 'Description' field with the text 'Vous allez être redirigé sur les pages sécurisées de Payline à la fin de votre commande.', and a 'Journal des logs' section with a checked checkbox for 'Activer'. The bottom panel, 'PAYLINE PAR ABONNEMENT', features a 'Fréquence des échéances' dropdown menu set to 'Une échéance tous les jours', a 'Nombre maximum d'échéances' input field with the value '12', and an 'ID produits éligibles' input field with the value '32'. A blue button at the bottom is labeled 'Enregistrer les modifications'.
